

email to SMS

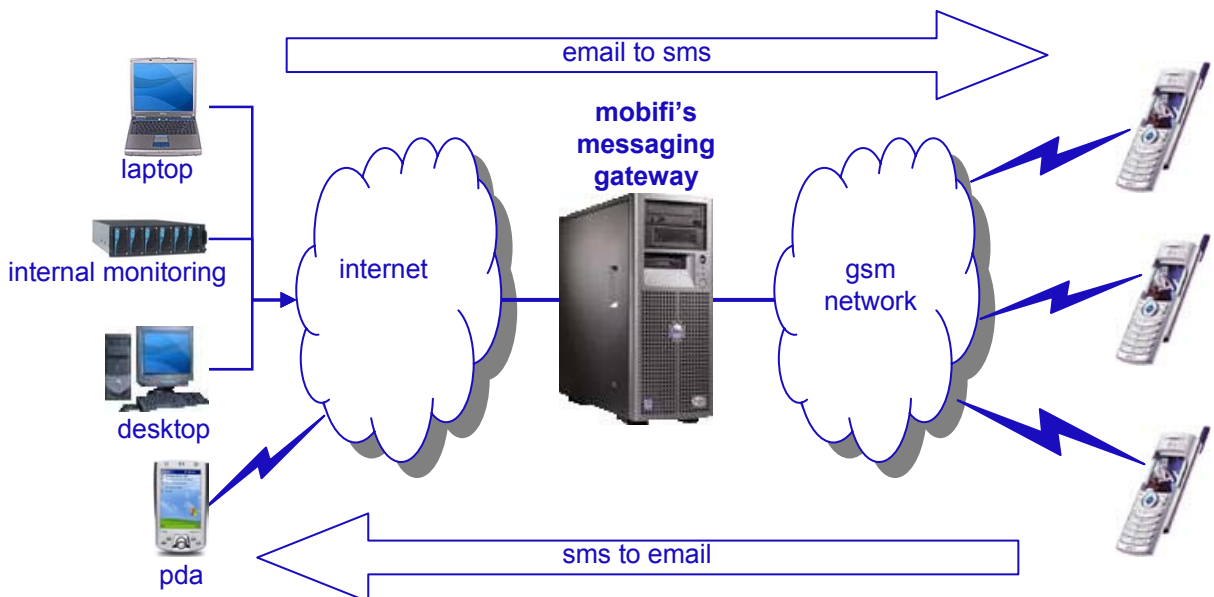

Mobifi's Email to SMS solution allows you to send SMS text messages directly from your desktop email client (Outlook, Notes, etc) to any mobile subscriber regardless of which network they subscribe to. It provides a cost-effective and efficient way of integrating SMS services into your organisation without the need for installing any new hardware or software. All you need is an Internet connection and an email client and we take care of everything else for you.

SMS can significantly improve the communication and information flow in your workplace and by using Mobifi's Email to SMS gateway you can contact people such as your staff, customers or suppliers via SMS directly from your desktop.

The service also offers the option of reply functionality allowing the mobile recipient to simply reply straight back to the email sender without the need for using a complicated reply format, this leaves you with the full 160 characters for your message.

You can now send information, news, updates, announcements and sales info via your existing email client such as Outlook to any mobile subscriber, national or international, for the same fixed price per SMS text message.

This is by far the simplest method for your organisation to send and receive SMS text messages.

How it works

Our advanced SMS messaging Gateway has been developed to convert email to SMS and SMS to email and can be used in any number of ways. To send an SMS text message from your email client you simply enter the mobile phone number in the following format:

<mobilenumber>@sms.mobifi.com

What does it do?

- SMS from every desktop
- SMS group messaging
- works from any email client
- no new software or hardware needed
- send and receive SMS
- receive SMS direct to your Inbox
- send SMS to any mobile worldwide
- no complicated reply formats

What can I use it with?

This service allows you to send and receive SMS via many different systems including:

- email
- databases
- internet & Intranets
- information Servers
- systems Monitoring applications
- software Programs

Mobifi's messaging Gateway receives this email, converts it into an SMS and sends it to the mobile user. The mobile recipient can then reply straight back to the email sender. It is that simple!
